# LOOKING FOR RIGHT BRAIN CREATIVITY WITH LEFT BRAIN PRACTICALITY?

For the past 11 years I have freelanced as a graphic artist/designer and have been an Art Director for various companies during my career. I have extensive knowledge about photography and video production and will occasionally take my own stock photos depending on client needs. I'm seeking a full-time employment position. I have a great understanding of typography and I promise I will never use Comic Sans in **ANYTHING**.

My right brain experience will provide you the creativity required to be a detail oriented graphic artist/designer, always learning new cutting edge technology to increase quality/productivity and reduce cost.

My left brain business experience will ensure that I will recognize least cost solutions to design issues, that I am a team player and that I will do what it takes to complete projects on schedule. Most importantly, I can and will work to achieve the team goals. I bring real world experience and I will be one of your best employees.

## ALL THE STUFF YOU REALLY WANT TO KNOW:

### EMPLOYMENT HISTORY

2008 - 2010 : Neiman Marcus Online | Interactive Designer

2005 - 2008 : Ariamedia / Midago | Art Director
